JUNAID KHAN

Software Engineering Student • Java Backend Developer • Spring Boot Learner

Arifwala, Punjab, Pakistan • junaidkhan835645@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Motivated Software Engineering student at COMSATS University with strong foundations in Java, Object-Oriented Programming (OOP), Data Structures & Algorithms, MySQL, and Software Engineering principles. Hands-on experience developing Java desktop applications, AI-powered web applications, and database-driven systems using Java, Python, Flask, and SQL. Familiar with Spring Boot, JDBC, REST API concepts, Git/GitHub, and modern backend development practices. Passionate about writing clean, maintainable code and eager to contribute to enterprise Java applications while continuously expanding expertise in Jakarta EE, Microservices, and Design Patterns.

TECHNICAL SKILLS

Programming Languages	Java, Python, SQL, JavaScript, HTML5, CSS3
Backend Development	Java, Spring Boot (Learning), JDBC, REST API Concepts, MVC Architecture
Databases	MySQL, SQLite
Tools & Technologies	Git, GitHub, IntelliJ IDEA, VS Code, PyCharm
Core Concepts	Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Database Design, Software Development Life Cycle (SDLC), Clean Code Principles, Problem Solving, Debugging
Currently Learning	Jakarta EE, Microservices, Software Design Patterns

EDUCATION

COMSATS University Islamabad (Sahiwal Campus) 2024 – Present

Bachelor of Science in Software Engineering

Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Software Engineering, Computer Networks, Information Security, Artificial Intelligence.

ACADEMIC & PERSONAL PROJECTS

Bug Tracking System Java | MySQL | JDBC | Git | MVC Architecture

- Developed a Java-based desktop Bug Tracking System designed for reporting, assigning, and managing software defects seamlessly.
- Implemented role-based authentication layers to cater securely to Admin, Manager, Developer, and Customer personas.
- Integrated a MySQL database utilizing JDBC to handle data storage, manipulation, and retrieval efficiently.
- Applied robust Object-Oriented Programming (OOP) design patterns to ensure a highly modular and maintainable codebase.
- Engineered essential core business modules including defect priority ranking, life-cycle status tracking, advanced search filters, and analytic reports.

AI Insider Threat Detection System Python | Flask | SQLite | HTML | CSS | JavaScript

- Developed an AI-powered web application designed to track and identify potential insider threats via granular user activity analysis.
- Built an interactive administrative dashboard delivering real-time metric alerts, threat indicators, and risk scoring matrices.
- Designed secure data-logging authentication and audit reporting modules utilizing an optimized SQLite database backend.
- Selected to present the functional system architecture at the university's Information Security Project Expo.

AetherFT – LLM Fine-Tuning Interface Python | Flask | Hugging Face | Frontend Stack

- Engineered a intuitive, full-stack web interface aimed at simplifying the fine-tuning workflows of Hugging Face large language models on custom proprietary datasets.
- Implemented streamlined modules for dataset management, Hyperparameter training configuration, and loss/accuracy evaluation metrics.
- Designed a responsive UI control panel to abstract complex CLI commands, dramatically reducing technical barriers for model management.

LEADERSHIP & ACTIVITIES

- Served as Team Leader for multiple university software projects, managing scopes and timelines.
- Coordinated version control, merge resolutions, and branch strategies using Git and GitHub.
- Active participant in Software Project Expos and peer-led technical demonstrations.
- Practiced Agile frameworks and scrum basics during academic team developments.

KEY ACHIEVEMENTS

- Successfully showcased the AI Insider Threat Detection System at the Information Security Project Expo.
- Maintained an active repository profile on GitHub showcasing production-ready Java and Python solutions.
- Continuously upskilling in enterprise architectures, Spring Boot, Microservices, and cloud readiness.

SOFT SKILLS

Problem Solving • Analytical Thinking • Team Collaboration • Communication • Adaptability • Time Management • Critical Thinking • Continuous Learning

LANGUAGES & INTERESTS

Languages: Urdu (Native), English (Professional Working)
Interests: Java Backend Development, Enterprise Software, Spring Boot, REST APIs, Microservices, Artificial Intelligence
